Khati	5.23	53.48	46.00
Jhimmar	3.66	53.33	46.67
Heri	3.04	48.07	14.28
Nai	2.69	50.00	50.00
Kumhar	1.58	61.00	39.00

Source : Field Survey, 2016

The high percent of Jat community in this village indicate that the study village which is in Jind District is fully Jat area in Haryana. The Valmiki community possesses the 2nd largest No. i.e. 19 percent of the total populaton. Valmiki community is dominate among scheduled castes. They are well educated and better other than scheduled castes. It can be said that this community get maximum benefit of reservation policy. Chamar community numerically rank third with 9.25 percent share in the total population of the village. They are not so educated and aware towards education and their literacy rate is very low. Therefore, they could not complete for Govt. jobs as affectively as Valmiki. They live under worse condition in the village. Fourth rank of Brahman caste with 7.80 percent population share, they have small agriculture land holdings in which they grow fruits and vegetables. Their social and economic status is fairly good. Lohar community was found 5.97 percent in the village as they migrated to villages where they are not ever before to do their traditional work. Ahir community was found 5.60 percent of total population in the village. It is found that their social and economic status is not so good. Jhimmar community consists 3.66 percent population of the village. It is found that their social and economic status is not good. Eadhi community consists 3.04 percent of population of the village. Heri community is dominated among scheduled castes.

Age groups

Table discuss the age structure of the population by castes. It is classified in three groups, which are as follows:

Young (0-15) years

Adult (15-59) years

Old (above 60) years
